ABOUT COMPANY

WORD STATEMENT FROM THE FOUNDER

We Bridge the gap between medicine and entrepreneurship in Africa.

At MedicPreneur, we bridge the gap between medicine and entrepreneurship in Africa. But let me be honest with you about why that gap exists, and why closing it matters so deeply to all of us.

There is a real problem that healthcare students face right now, in classrooms and clinics across this continent. How do you hold your academic ambitions in one hand and your entrepreneurial dreams in the other, without dropping either? How do you survive the demands of medical school and still pursue the life you actually want to build?

We know how difficult, how almost impossible it can feel to focus on your studies and still chase the bigger picture. And we know this not just from observation. We know it because many of us have lived it.

In school, they teach medicine. They do not teach business. They prepare you to save lives — and that is a sacred thing. But to establish a health startup, to build something sustainable, to earn what you are actually worth, you need business strategies that were never part of your curriculum.

The financial reality of healthcare workers who depend solely on clinical skills has long been troubling. Talented, hardworking professionals, underpaid, undervalued, and without the tools to build income independently. Meanwhile, it is the hospitals, the institutions, that accumulate enough to reinvest, to grow, to give back.

This is not a criticism of the system. It is a call to change it. Because medicine is not just a calling and a passion. It is a profession, and every profession must be able to sustain the people who dedicate their lives to it.

This is why MedicPreneur exists. We are building the bridge, not just in theory, but through practical, actionable, community-driven transformation.

We teach high-income skills. Not just the skills themselves, but how to monetise them, how to turn what you know into what you earn. We serve three groups of people:

• Healthcare students who are starting from zero. We help you discover and develop profitable ventures from the ground up — building skills you never knew you had and showing you exactly how to turn them into income.

• Students and professionals with skills, but no strategy. You already have what it takes. We give you the business framework to take what you have and build it into a full-functioning, income-generating enterprise.

• Healthcare professionals ready to build or formalise their establishments. We provide the mentorship, knowledge, and strategic support needed to run a successful, sustainable health business — long after graduation.

What makes MedicPreneur different is not just what we teach. It is what we are building, a community of medical professionals who see themselves as more than healthcare providers. Professionals who are innovators. Builders. Entrepreneurs.

Academic excellence and entrepreneurial success are not opposites. They never were. And through tailored programmes, expert mentorship, and a network that spans 13 African countries, we are proving that every single day.

You do not have to choose between the life you trained for and the life you dream of.

MedicPreneur was built to show you how to have both.

ABOUT COMPANY

MedicPreneur

MISSION AND VISION STATEMENT

VISION STATEMENT

To empower medical students with the knowledge and skills to excel in both academics and entrepreneurship, shaping a future where they can seamlessly integrate their medical careers with successful business ventures.

MISSION STATEMENT

At Medicpreneur, our mission is to equip healthcare students with the practical insights and strategies needed to balance academic excellence and entrepreneurial success. We aim to guide those without business ideas to discover and develop profitable ventures and provide comprehensive training on running successful businesses post- graduation. Through tailored programs and expert mentorship, we aspire to create a community of medical professionals who are not only healthcare providers but also innovative entrepreneurs.

ABOUT US

From Our Mission

MedicPreneur exists to bridge the critical gap between rigorous medical education and entrepreneurial innovation. We are dedicated to empowering medical students and newly graduated doctors to harmonize academic excellence with business acumen, ensuring the next generation of healthcare professionals is equipped to lead, innovate, and sustain viable health establishments.

Our Core Phylosophy

Traditionally, medical students face a binary choice: pursue clinical excellence or entrepreneurial success. MedicPreneur dismantles this barrier. We operate on the conviction that medical schools teach medicine, but the real world requires business intelligence. We provide the ecosystem necessary to merge these pursuits seamlessly.

WHO WE SERVE

The Aspiring innovator

The Aspiring Innovator: We provide a launchpad for students with no prior business experience who fear that entrepreneurship will compromise their grades. We show them how to achieve both.

The Student Entrepreneur

The Student Entrepreneur : We act as an accelerator for students already running businesses, guiding them to maximize their potential and scale their operations without neglecting their studies.

Doctors

The Doctor : We equip young doctors with the essential business frameworks missing from standard medical curricula, enabling them to build sustainable, well-managed health establishments.

Our Methodology

Through the MedicPreneur Academy, we deliver a holistic suite of services including specialized workshops in financial management, high-level mentorship from industry veterans, and project development support for student-led initiatives solving real-world healthcare issues.

COMPANY HISTORY IN 2025

MedicPreneur

OUR HISTORY: SIX MONTHS OF PAN-AFRICAN MOMENTUM

MedicPreneur's organizational history is defined by a single, powerful metric: rapid, high-impact scaling. In just six months, we have evolved from a groundbreaking idea to a continental movement, establishing a direct operational footprint across 12 African nations.

This exponential growth validates the critical need for our model and confirms our ability to mobilize the next generation of healthcare leaders across diverse regulatory and academic environments.

CONTINENTAL FOOTPRINT: 12 COUNTRIES IN 6 MONTHS

Our network spans North, East, West, and Southern Africa, ensuring localized impact and broad reach. Our active operational countries include:

- West/Central Africa: Ghana, Nigeria, Cameroon
- Southern Africa: South Africa, Zambia, Zimbabwe, Mozambique
- East Africa: Kenya, Ethiopia, Uganda, Tanzania
- North Africa: Egypt

> **"SINCE OUR INCEPTION, MEDICPRENEUR HAS MOVED WITH URGENCY TO BRIDGE THE GAP BETWEEN MEDICAL EDUCATION AND ENTREPRENEURSHIP."**

The launch, (July)

Our journey officially began on July 14th with our inaugural international webinar, spearheaded by the MedicPreneur Zambia chapter in partnership with the University of Zambia Medical Students Association. This event, attended by 132 registered students from 7 countries, featured Prof. Wilbroad Mutale (CEO, Teledoc) and our Founder, Moses Adetoro. It was here that we validated our core thesis: medical students are eager to transition from passive learners to active innovators.

Holistic Expansion (August)

On August 23rd, the Nigerian Chapter expanded our mandate. recognizing that entrepreneurial success requires personal sustainability, we launched the "Four Pillars of MedicPreneurship" program. Featuring Dr. Emmanuel Yila (Founder, Dox Explorer) and mental health advocate Rest Essence, this session moved beyond business skills to address wellness, balance, and academic excellence—crucial tools for the modern student-entrepreneur.

Strategic partnerships and growth (September)

Our influence culminated in September with two major milestones. First, we partnered with the Federation of African Medical Students Association (FAMSA) on September 6th for their Health Innovation Exchange Summit. This partnership cemented our position as a key player in shaping the future of African healthcare leadership. Shortly after, on September 20th, the Ghana Chapter hosted a high-impact session for 137 members across 4 countries, reinforcing our commitment to giving students the practical tools to merge clinical rigor with business viability.

CONCLUSUON

The successful deployment of our model across 12 countries in less than half a year is a testament to the immense demand for balance, innovation, and leadership training among Africa's future doctors. We are not just holding webinars; we are building an integrated, sustainable network designed to power Africa's health innovation ecosystem.

COMPANY HISTORY IN 2026

OUR HISTORY: ONE MONTH (JANUARY) OF PAN-AFRICAN MOMENTUM

MedicPreneur is a Pan-African initiative dedicated to equipping medical and healthcare students with the dual competency of academic excellence and entrepreneurial literacy. We recognize that for Africa's healthcare system to evolve, its future providers must be more than clinicians—they must be innovators, leaders, and builders.

JANUARY 2026 KEY METRICS

In our most recent intensive summit, we demonstrated the massive demand and scalability of our model. Over a single weekend, MedicPreneur achieved the following:

- • Reach: 644 active student participants.
- • Geographic Diversity: 10 African countries represented.
- • Academic Breadth: Students from 62 distinct healthcare departments.
- • Engagement: 4 hours and 50 minutes of high-impact, live intensive training.
- • Knowledge Transfer: 5 "Top 1%" industry-leading speakers and healthcare graduates.

> **"IF WE WANT TO BUILD A BETTER HEALTHCARE SYSTEM FOR AFRICA, WE MUST START BY BUILDING BETTER STUDENTS"**

Q1 impact benchmark

For the latter part of last year, our conversations at MedicPreneur focused on the delicate art of balancing rigorous academic pursuits with entrepreneurial ambition. We explored how to build businesses without failing exams.

But as we stepped into 2026, I realized that to truly redefine the future of African healthcare, we cannot simply "balance" academics, we must master them. The most impactful healthcare entrepreneurs are first and foremost, competent healthcare professionals.

That was why, in January , we invested heavily in the academic lives of healthcare students across Africa.
We didn't just talked about excellence; We displayed it by curating a panel representing the top 0.1% of healthcare talent on the continent.
We have brought together the Best Graduating Students from four different African nations.
We moved beyond "motivation" and got into the systems, the discipline, and the mental frameworks required to finish at the very top.

If we want to build a better healthcare system for Africa, we must start by building better students.The Apex is not a destination; it is a standard.

upcoming events

The healthcare landscape in Africa is evolving rapidly. While medical professionals are rigorously trained in clinical excellence, there remains a significant gap in business acumen. For many Optometrists, the focus has historically been strictly on patient care, often at the expense of financial sustainability and growth.
The reality is that the business of health professions has always been as vital as the practice itself. Beyond the clinical practice lies the real challenge: sustainability. Many Optometrists fail to reach their full financial potential not because of a lack of medical skill, but because they lack the necessary business strategies, branding insights, and sales proficiency to thrive in a competitive market.

MedicPreneur seeks to bridge this gap between medicine and entrepreneurship in Africa. This event is the first in a series of profession-specific programs designed to equip healthcare providers with the "business of their profession."

The primary goal is to transform Optometrists from purely clinical practitioners into "Opto-preneurs."
• To Educate: Provide actionable insights on business development specific to the eye-care industry.
• To Empower: Equip attendees with sales and branding tools to increase their practice's revenue.
• To Bridge the Gap: Demystify entrepreneurship for medical professionals, showing that ethical practice and profitability can coexist.
• To Network: Create a community of business-minded Optometrists across Africa.

2026 COMPANY HISTORY IN PICTURES

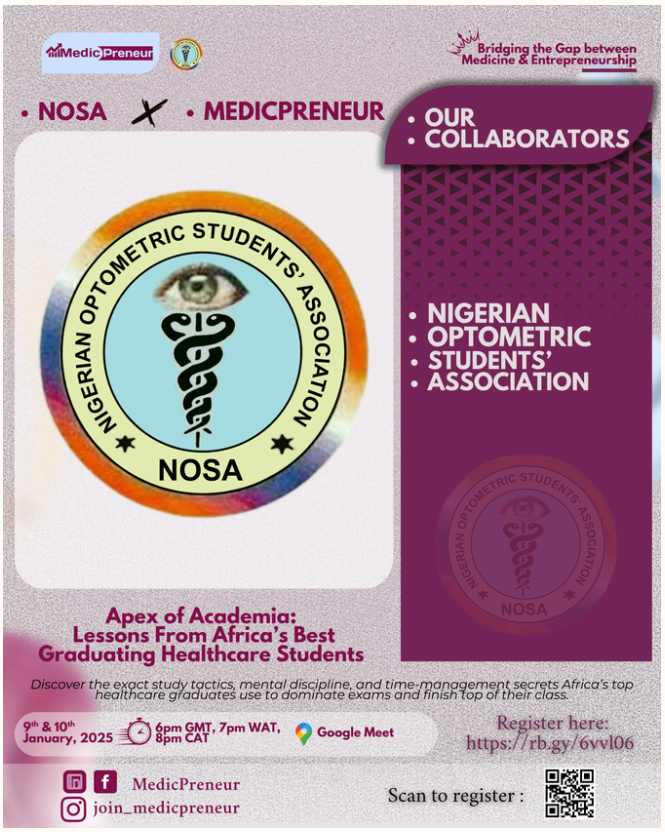

Apex Of Academia was held on the 9th and 10th of January, 2026

It was done in Partnership with the OPTOMETRY STUDENTS ASSOCIATION OF GHANA, University of Cape Coast

On the 1st of February, we announced admission into our Academy

And in partnerships with the Nigerian Optometric Students Association

COMPANY SERVICE

MedicPreneur

WE TRAIN HEALTHCARE STUDENTS AND PROFESSIONALS TO BUILD

At MedicPreneur, we understand the dual pressure you carry. The academic load is real. So is the ambition to build something of your own. Our services are designed to meet you exactly where you are — and take you where you want to go.

Whether you are a student with no existing skill, a professional with untapped ideas, or a practitioner ready to formalise a business — we have a programme for you.

HIGH INCOME SKILLS TRAINING

In school, they teach medicine - not business. We close that gap. MedicPreneur equips healthcare students with in-demand, high-income skills tailored for the modern health economy.

From digital skills to clinical content creation, health consulting, and beyond — we do not just teach you the skill. We show you exactly how to monetise it.

Mentorship & Community

You do not have to figure this out alone. MedicPreneur connects you with experienced mentors — healthcare entrepreneurs who have walked the path and built real businesses.

Our community spans 13 African countries. It is a network of peers, practitioners and professionals all committed to the same thing: building a life that works — clinically and financially.

Three Audiences. One Mission.

We serve healthcare students with no skills yet, those with skills but no business structure, and professionals ready to build or scale their health enterprises.

Every service we offer is built around one conviction: that medical excellence and entrepreneurial success are not opposites.

They are partners. And we are here to help you integrate both, seamlessly.

BUILD YOUR STARTUP
Our Flagship Bootcamp

Build Your Startup is MedicPreneur's intensive entrepreneurship bootcamp designed specifically for healthcare students and professionals. Over a structured programme, participants move from idea to execution — learning how to validate a business concept, build a viable model, attract customers, and launch a health-focused startup. With expert mentors, peer accountability, and real-world assignments, this is not a seminar. It is a launchpad. Whether you are starting from zero or building on an existing idea, Build Your Startup gives you the strategy, skills, and support to turn your vision into a functioning business.

Health Enterprise Development

For healthcare professionals ready to establish or scale their own health businesses — clinics, health tech ventures, consulting practices, wellness brands — MedicPreneur provides the comprehensive training, mentorship, and frameworks needed.

We walk with you from concept through launch, covering everything from registration and branding to operations, staffing, and sustainable revenue models.

Our goal is not just to help you open a business. It is to help you run one that thrives.

What You Will Learn

High-income digital & creative skills for healthcare professionals

- How to package, price and position your expertise
- Business strategy fundamentals for health entrepreneurs
- Marketing and branding for health-focused ventures
- Financial literacy and income diversification
- How to build multiple income streams while still in school

PARTNER WITH US

PARTNERSHIP PATHWAYS

MedicPreneur is Africa's leading platform bridging healthcare education and entrepreneurship, with an active presence across 13 African countries and a growing community of medical and healthcare students, professionals, and innovators. We partner with organizations that share our conviction: that the future of African healthcare depends on professionals who are not only clinically excellent, but entrepreneurially equipped.

We are proud to be pursuing a strategic partnership with Life Beyond Clinical Practice — a career development platform dedicated to empowering healthcare professionals who are ready to expand their impact beyond traditional clinical roles. This alignment is not coincidental. It is the meeting of two missions that were always meant to intersect.

HOW WE CAN PARTNER

MedicPreneur offers flexible, high-impact partnership structures tailored to the goals, reach, and capacity of each partnering organization. Below are the primary collaboration pathways available for Life Beyond Clinical Practice:

The content funnel

01. Life Beyond co-produces a dedicated series inside MedicPreneur's content ecosystem: "Beyond the Clinic: Building a Career That Lasts" — targeting MedicPreneur's graduating members and professionals. Sponsored podcast episodes and webinar sessions are cross-published on both platforms. Measurable referral links track conversions into Life Beyond's coaching programmes.

Life Beyong Clinc gets;

- Named partner on all programme materials
- Direct access to Africa's most ambitious healthcare professionals
- Warm audience for coaching services & podcast
- Continental brand exposure across 13 countries

The pipeline play

02. Life Beyond sponsors MedicPreneur's Health Enterprise Development programme, service for students and professionals formalising their health businesses. Every session across all 13 countries carries: "In partnership with Life Beyond Clinical Practice." Targeted content from LBC is distributed to every participant at programme close.

Life Beyong Clinc gets;

Trackable audience funnel to coaching & memberships
- Co-branded podcast/webinar visibility in 13 markets
- Featured expert positioning in Africa's health-entrepreneurship space
- Shared content IP with MedicPreneur's 1000+ active community across board.

PARTNER WITH US

THE MEDICPRENEUR FELLOWSHIP

03. A jointly-branded cohort programme, 15–20 selected African healthcare professionals per cycle — combining MedicPreneur's entrepreneurship training with Life Beyond's career pivot coaching.
This is a first-of-its-kind programme: no one has built the full student-to-entrepreneur-to-career-pivot journey as a single product. This is sponsor-ready, grant-eligible, and globally pitchable.

Life Beyond Clinical Practice gets;

- Headline co-founder status on acontinent-wide flagship programme
- Joint grant applications & sponsorship pitches to global health funders
- Shared media coverage and press opportunities
- A premium alumni network of African health entrepreneurs as a long-term coaching pipeline

04. Life Beyond sponsors MedicPreneur's Health Enterprise Development programme, service for students and professionals formalising their health businesses. Every session across all 13 countries carries: "In partnership with Life Beyond Clinical Practice." Targeted content from Life Beyond is distributed to every participant at programme close.

Life Beyond Clinical Practice gets;

- Headline co-founder status on a continent-wide flagship programme
- Joint grant applications & sponsorship pitches to global health funders
- Shared media coverage and press opportunities
- A premium alumni network of African health entrepreneurs as a long-term coaching pipeline

STUDENT LEADERSHIP INITIATIVE

05. The SLI programme targets final and penultimate-year health professions students across Africa. MedicPreneur's community is that demographic — across 13 countries, active today. LBCP does not need to build African distribution.
MedicPreneur already built it. Equally, MedicPreneur's graduates — professionals who have completed our entrepreneurship programmes — are the exact audience LBCP's coaching and career pivot services are designed for. MedicPreneur feeds the pipeline that LBCP converts.

We're open to LBCP drawing out a structured partnership framework for us to explore.

CONCLUSION

> The intersection of healthcare excellence and career expansion is not a niche. It is the future. MedicPreneur and Life Beyond Clinical Practice are both building that future.

NEXT STEPS

We invite Life Beyond Clinical Practice to explore a formal partnership with MedicPreneur. The next steps are straightforward:

1. Review this concept note and identify which partnership pathways align best with your current goals and capacity.
2. Schedule a discovery call with MedicPreneur's Founder, Moses Adetoro, to discuss the specifics of the collaboration.
3. Upon alignment, a formal Partnership Agreement and Scope of Collaboration document will be issued.
4. Both organizations agree on launch timelines, deliverables, and co-promotion commitments.
5. Partnership goes live — and we begin building something the African healthcare community will remember.
